Courses

Basics of Machine Learning by Coding Monday community in Tashkent
Machine Learning by Stanford University on Coursera

Native Language

Uzbek

Foreign Languages

English - Advanced, level C1 - 7.0 IELTS   **Russian** - Fluent speaker, level B2

MusicSpider

bit.ly/musicspider

MusicSpider is a chrome extension for listening to music while browsing.

Because the songs are constantly crawled by spiders, this name was given.

IELTSzone

ieltszone.org

I built IELTSZone according to my sister's request to teach and learn with her peers.

It has forum, dictionary and the resources make it a unique place for the learners.

42 Questions

42.uz

42 challenges I have come up with while learning to code. It offers creative programming problems. It shows problems in Facebook-like posts and accepts answers in chat.

G0 Event Bot

t.me/g0_eventbot

It's a telegram bot for finding and registering for events. I developed it for GroundZero co-working in exchange of free co-working space for a year.

TBBM

tbbm.uz

Computer Based Test application for Korean language based on TOPIC and booking system for the examination. Organizations of immigration to Korea in Uzbekistan use the application for finding out Korean language level of applicants.

I can share the source code of the above-mentioned projects upon request
